DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 11 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Morimoto, et al. (JP 01-297534).

Regarding claims 1 and 14, Morimoto discloses “a light irradiation device (Fig. 1, ref.# 4) that irradiates light on a predetermined target area set up on a work piece, and a photographic device (Fig. 1, ref.# 3) that photographs the target area and outputs obtained target area images to an image processor for the purpose of a surface scan, wherein said light irradiation device has multiple light irradiation units (Fig. 1, ref.# 7) that are independently light intensity adjustable, and the light intensity adjustment system further comprises a light intensity control unit (Fig. 1, ref.# 1) that controls respective light intensities of said light irradiation units so that brightness of the various parts of the target area images output by said photographic device approaches a predetermined standard value (Abstract, lines 6-13).”

Regarding claim 2, Morimoto discloses “wherein said light intensity control unit controls the light intensities of the various light irradiation units to make the brightness of the various parts of said target area image uniform.” (Abstract, lines 6-13)

Regarding claim 11, Morimoto discloses "wherein the light irradiation device comprises light irradiation units lined up in a linear or surface shape." (Fig. 1, ref.# 7)

Allowable Subject Matter

3. Claims 3-10, 12 and 13 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Yang, et al. (US 2003/0215129), Walker (US 6,359,662) and Inbar, et al. (US 6,101,749).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rodney E. Fuller whose telephone number is 571-272-2118. The examiner can normally be reached on 8:00am - 4:30pm.
